

Fisher Textiles Launches Enhanced Printable Black-Back Fabric Media

Matthews, NC (August 30, 2022) - Fisher Textiles, the leading supplier of fabric for digital printing, is pleased to introduce GF4030 Nirvana Plus, an enhanced printable soft signage black-back fabric developed to significantly decrease smoke exhaustion during the transfer process. Nirvana Plus has 30% more fabric on the face than other printable black-back media. The additional fabric increases vibrancy of printed colors and absorbs heat during paper transfer.

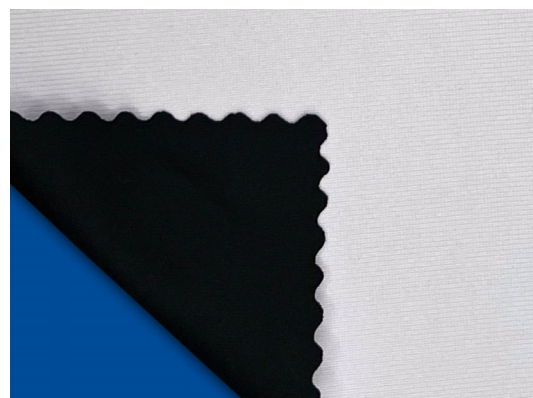

GF4030 Nirvana Plus is a two-in-one solution for printable fabric with a built-in liner and a finished back, providing cost savings in material and labor. It is ideal for hanging banners and retractable banner stands because of its printability and finished coated back side. Other uses include frontlit SEG and pillowcase fabric displays with no liner. GF4030 Nirvana Plus weighs 9.5 oz and is stocked 126-inches wide. It is flame retardant.

A 5-meter-wide treated version of this fabric, DD9930 Nirvana Plus, will be available soon for direct and UV-curable printing

Contact Fisher Textiles at 800-554-8886 or info@fishertextiles.com for more information.
