

Fisher Textiles Triples Down on Printable Blockout Fabric With Three Versions

Matthews, NC (February 22, 2024) - Fisher Textiles, the leading supplier of fabric for digital printing, has added two additional versions of White-Out printable blockout to its lineup. DD 7118 White-Out, released last July, is a two-in-one solution for direct printable fabric with a built-in liner, eliminating the need for extra material and finishing. Newly released versions of this style include GF 7108 White-Out, for transfer dye sublimation, and ET 9118 White-Out, for transfer dye sublimation and UV-curable printing, made with 44% post-consumer recycled polyester.

GF 7108 White-Out from Fisher Textiles.

White-Out is an excellent alternative to printable black-back fabric and has a specialty coating on the back to prevent see-through. It protects printing equipment and significantly decreases smoke exhaustion during the transfer process. Finished applications include SEG, pillowcase displays, banners, and backdrops. Stocked 125-inches wide, it weighs 10.1 oz and is flame retardant (NFPA 701 and California Title 19).

Contact Fisher Textiles at 800-554-8886 or info@fishertextiles.com for more information.
